About us

LUME /lù·me/ light of life

LUME is Lighting design consultant founded in 2022 and based in Jakarta, Indonesia. In each project, we regularly collaborate with the client, architect, interior designer, and other project participants to create a pleasant atmosphere while implementing new ideas, calculations, and analyses.

We give the best lighting solution for every project and invent new ambiance and emotions. We believe with a wise budget, analyzing and calculating every aspect of the project will create a good ambiance.

How do we work

We Imagine
We Analyze
We Develop
We Assist
We Finish

Before the project started, we usually ask about the client's needs, the building's typology, architect, interior, and other parties' concepts to ensure our lighting approach and scenario.

Synergy in collaboration with other parties in developing our lighting concept and producing lighting packages includes details.

We support the on-site construction process, resolve any problems, and use mock-ups to explore possibilities.

Provide aiming, adjusting lighting program systems, and review every detail of the installation when the project is done.
